

Prime Antenna Location

The Regions Center Building is the second tallest building in downtown Little Rock. Broadcast Services, Inc. has managed this antenna site since the late 1970s. The site accommodates a variety of two-way and microwave communications equipment. A common area for land mobile radio equipment and other telecommunications systems has been allocated. Standby electrical power facilities for transmitter plants can be appropriately located within the building.

At Broadcast Services, we pride ourselves on maintaining clean, interference free sites. Our competitive rates can save you money. Contact Carrie Walker or Douglas Weaver for details.
