

Prime Antenna Location

The US Bank Center (formerly known as the Pilsbury Center) is two buildings of 41 and 23 stories tall. The taller tower accommodates a variety of two-way, microwave, and other communications equipment. Common areas for telecommunications systems have been allocated on the 40th floor. The 23-story tower would be ideal for cellular communications in hard-to-reach downtown areas.

At Broadcast Services, we pride ourselves on maintaining clean, interference-free sites. Our competitive rates can save you money. Contact Carrie Walker or Douglas Weaver for details.
